## GREETINGS

I am very honored and pleased to welcome you to the Advanced Infrared Technology and Applications (AITA 2025) at Integrated Research Center of Kobe University on September 15-19, 2025.

This biennial international conference, mainly held in Italy, is now in its 18th time and has become a major event in the field. This time it will be held in Japan, at a pivotal moment when there are major changes in the application of advanced infrared technology and analysis methods to NDT, as well as their integration with IT, IoT, AI, and new energy industries. The symposium aims to provide a platform for comprehensive discussions on the latest international infrared measurement technologies and future prospects, and to provide an opportunity for broad-based research and its results, discussions, and technical exhibitions. We are preparing for the upcoming AITA2025 with the organizing committee members and expect approximately 200 participants from domestic and international backgrounds.

We hope for active discussions among the participants and would like to create opportunities for information exchange and interaction with companies for which we are planning various sponsorship programs.

In this regard, we humbly ask for your understanding of the purpose of this international conference and earnestly request your support for sponsorship despite the current economic challenges. Although it would be ideal to meet and make this request in person, please allow us to express our request and gratitude through this letter.

AITA 2025 Organizing Committee  
Chair, Takahide Sakagami  
(Professor, Kobe University)

# AITA ADVANCED INFRARED TECHNOLOGY & APPLICATIONS 2025
